

Impatiens production solutions

PanAmerican Seed®

Quick Reference Solutions Chart

Since the introduction of the Elfin series, PanAmerican Seed has been a pioneer in developing impatiens by bringing you unique colors, patterns and species with an emphasis on professional quality throughout. This trailblazing spirit continues today with the introduction of Impreza. This brochure illustrates the entire PanAmerican Seed impatiens family, and what each member can do to meet your impatiens production needs. The chart below provides a quick reference for each series to help you select the right impatiens product for your unique market.

SERIES	Impreza™
OUTSTANDING FEATURES	Best holdability
HABIT & VIGOR	Less stretch due to innovative plant structure potentially reduces PGR needs
OPTIMAL PRODUCTION CONTAINER	Small cell for high-density production
COLOR RANGE	Top-selling core colors
FLOWERING	5 to 7-day bloom window

Super Elfin® XP

Best uniformity in a broad color range

Super Elfin® Standard

Must-have colors to round out the widest impatiens offering

306 pack and larger

Large range of core colors and novelty patterns

Unique and specialty colors

Yellow

Well-matched color range allows for uniform mixes

5 to 7-day bloom window across the widest color range

Compatible with Super Elfin XP

Orchidlike blooms

One-week flowering window

**For holdability, we
recommend Impreza™**

Breeding-breakthrough Impreza has a superior plant structure that buys you more time at retail and possibly reduces your PGR costs.

All-new Impreza offers a streamlined range of the top-selling colors plus unique patterns in one of the most grower and retailer-friendly impatiens series available. Reduced apical dominance and decreased internode length combine to produce easy-to-manage plants that potentially need fewer PGRs and provide good soil coverage with less upward stretch. All 8 colors finish in a 5 to 7-day window for efficient shipping. In the store, Impreza is proven to deliver the longest shelf life of any impatiens to extend sales and reduce dump. Garden fill is good and plants stay full and nice looking all season. The right choice for high-volume sales.

Impreza

Competition

For best uniformity in a broad color range, we recommend Super Elfin[®] XP

Super Elfin XP features uniformity in habit, vigor and timing across a very broad color range.

Super Elfin XP varieties deliver a tight, 5 to 7-day flowering window across all colors — core and novelty — so all plants ship at the same time to meet market dates. XP assures exceptionally uniform habit and plant vigor, consistency of early flowering and bigger blooms than the competition. The broad color range lets you mix and match any Super Elfin XP variety to achieve the most uniform impatiens crop.

Rose XP was announced as "Best Impatiens (seed)" at the Colorado State University 2009 trial.

For exotic yellow, we recommend Jungle Gold

Vigorous and exotic Jungle Gold is an easy eye-catcher at retail.

Free-flowering plants display golden yellow, orchidlike blooms above dark, glossy green leaves. Combines best with other vigorous plants and is the ideal choice for mixed or mono shade containers. An excellent way to add an attractive impulse retail item to your program.

Jungle Gold F1 Novelty Impatiens

Height: 15 to 18 in. (38 to 45 cm)

Spread: 12 to 14 in. (30 to 35 cm)

A **Hot Summer Survivors** and **Made for the Shade** selection.

For easy New Guinea mixes,
we recommend Divine™

Divine has a one-week flowering window for easy and simple mixes made perfect for the landscape market.

Divine delivers outstanding performance to growers, gardeners and landscapers alike. The only professional quality seed-propagated New Guinea on the market offers you ease of ordering, timing, delivery and storage, and fits in with existing mechanical transplanting and plug programs to deliver fast turns and high-density production. Establishing quickly in the landscape, Divine is so uniform in habit and timing that it makes an excellent choice for designer New Guinea mixes for the landscape market.

Mystic Mixture had an excellent performance at the Dow Gardens 2008 trial in Midland, MI.
